Whitefriars Housing Group : Heddle Grove damage statement

Rachel Hobbs, Whitefriars' Head of Business and Quality, said: "Mrs Barton's home has suffered some damage to brickwork on the external wall, and there are some minor cracks visible on the inside. We've carried out a full technical inspection and found that fortunately the collision has not caused any damage that will compromise the safety of the building in any way.

"We will be doing some remedial work outside and some plastering inside the building. Mrs Barton will not need to move out while the work is carried out. Our contractors will complete the work inside and out by the end of the month."
